SPEED TAP OPEN-END ATLAS™

Interstate Brick is the leader in the brick industry in the manufacture of hollow clay structural brick technical innovation

New from Interstate Brick,

the **Speed Tap Open-End Atlas™** features:

- Eased brick placement
- Increased Speed of Construction
- No over-head lifting
- Labor Savings
- Solid head joints

Speed Tap Open-End Atlas™ brick is the mason contractor's solution to large bar-diameter lap-lengths. With bar laps increasing in excess of the height of a man, the placement of closed-end reinforceable structural masonry units in a reinforced masonry wall is next to impossible. To order

Speed Tap Open-End Atlas™, contact Interstate Brick Co. or your local Interstate Brick dealer.
